

Now available outside of EMS & Fire!

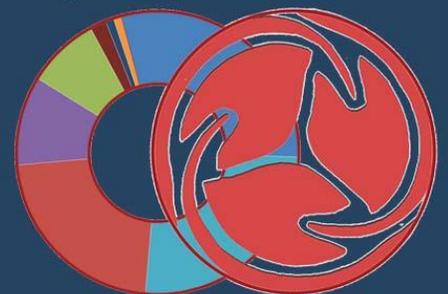

When one of the world's largest fire departments needed contact tracing deployed in under a week, Los Angeles County Fire chose MEDIVIEW™ TRIPS for COVID-19 Exposure Tracking.

In March 2020, Beyond Lucid Technologies introduced the first-of-its-kind "over time" charting system for compiling suspected & confirmed COVID-19 exposure reports covering 6000 personnel across the Los Angeles County Fire Department. **We deployed the system in five days.**

MEDIVIEW™ TRIPS for COVID-19 Exposure Tracking aggregates monitoring forms over time for contact tracing and follow-ups. TRIPS transforms data to information, empowering managers to determine who should be sent home to get better, and who is ready to return to work. Insights to keep teams large and small safe during the COVID-19 crisis. Let us protect you too.

Beyond Lucid Technologies
BETTER DATA. FASTER SINCE 2009 • BeyondLucid.com

FROM A TEAM BACKED BY CARNEGIE MELLON UNIVERSITY, with over a decade track record innovating for Fire and Emergency Medical Services, MEDIVIEW™ TRIPS for COVID-19 Exposure Tracking meets the needs America’s progressive public health and safety agencies. The software is already deployed in Texas, California, Arizona, Oklahoma, and Connecticut.* When infections spiked around Houston, one EMS Chief wrote: “I am not sure which way is up most days and this is super helpful. The screening system is working great and we have way too many to track any other way.”

** As of July 2020*

KEY FEATURES & FUNCTIONS:

- MEDIVIEW™ TRIPS for COVID-19 EXPOSURE TRACKING is a contact tracing program built on software that Fire & EMS agencies now use across 27 U.S. states to share information in real-time and over time. It was inspired by an agency that was engaged in a managed care program for high-risk members of its community, and the department inverted the technology onto its own team members to care for them over an extended period, given the need to track symptoms of possible COVID-19 infections.
- The importance of syndromic surveillance is often emphasized by the CDC and the National Institutes of Health. MEDIVIEW™ TRIPS for COVID-19 EXPOSURE TRACKING includes a secure cloud-based portal that lets hospitals and public health quickly update infection status for every person being monitored.
- All that organizations need to begin using MEDIVIEW™ TRIPS for COVID-19 EXPOSURE TRACKING is a personnel or student roster. No equipment to buy or software to install! The roster is synchronized to a secure database that track symptoms, medications and other details over time, for a real-time view of how everyone is feeling, who needs further attention (or to be sent home) and who is getting better.
- Symptoms tracked on a form that takes just about 30 seconds to complete include temperature, pain, cough, loss of taste or smell, and more, including medications. These are processed by an algorithm that offers a recommendation of whether the individual should be considered “likely to test positive.” This is not the same as testing positive: like a pregnancy test, MEDIVIEW™ provides an indicator value for triage of testing priority, especially where tests are in short supply. The algorithm has been successful in real-world scenarios since March 2020, including in two of the country’s largest counties, with a false positive rate of ZERO PERCENT at Los Angeles County Fire after 15,000+ forms submitted. The algorithm is governed by the Los Angeles County Fire’s Medical Director’s Office (UCLA, USC Keck).

SUMMARY OF TERMS & CONDITIONS

Your subscription to MEDIVIEW™ TRIPS for COVID-19 Exposure Tracking is governed by the MEDIVIEW Individual Agency License Terms and Conditions, which incorporates provisions related to HIPAA and other privacy protections and will be provided for execution prior to deployment. Deployments will be implemented in the order they are received, with exceptions at BLT sole discretion. From time to time we will ask you to provide to us information so that we can perform our obligations under this Agreement. We will treat all your personal information as confidential (although we reserve the right to disclose this information in the circumstances set out below). Given the clear community interest in the use of contact tracing technologies, we may inform other organizations that you have signed up to use MEDIVIEW™ TRIPS for COVID-19 Exposure Tracking, but we will never use your marks without your permission. We will keep your information secure and fully comply with our obligations under applicable data protection and privacy laws. Upon receipt of a signed license agreement, BLT will create an agency for you in the MEDIVIEW™ database; send you implementation instructions; introduce you to our training and technical onboarding teams; and take you through an onboarding process that will include digital tools. System modifications and on-site training may incur additional costs. The terms of the MEDIVIEW™ will govern cancellation. You agree to hold Beyond Lucid Technologies, our agents, employees, affiliates, and vendors harmless for all incidental, special, punitive, or consequential damages of any kind arising out of your use of MEDIVIEW™ TRIPS for COVID-19 Exposure Tracking. Your sole and exclusive remedy will be limited to reimbursement of the funds already paid to us. **NOTICE: This application is *not* a medical device.** It is not intended to be a medical device, nor does it provide clinical guidance. It is a data tracking system intended to enable your organization to make informed personnel management decisions. This Agreement can be executed in person, email or post mail. This Agreement will be deemed to have been properly received upon confirmation and receipt of applicable payment.
